PHILOSOPHY

CORPORATE CULTURE

Let human Beings
Enjoy High-quality life

Every product, every combination
every detailAre full of different tastes
different personalities, different cultural sensibilities
Casual revealing of the spirit,
embellished the peace of life

COMPANY PROFILE

ZHEJIANG HADIYA MACHINERY CO.,LTD is located in Zeguo Town Zhejiang,which is well know as "The Water Pump Town". Since its establishment,our company has always pursued the business philosophy of "Professional to create excellence, Quality to create value,Attentive service to customer and Contribute to the society"

www.hdypump.com

Our aim:WIN-WIN situation,you win first,we second

Application&feature

These pumps are for clean water without abrasive particles and the fluids which are not chemically aggressive to the pump componets.

They are used for domestic appliance and for the automatic distribution of water from surge tanks,for watering gardens and for boosting in sufficent mains water pressure.

Working Condition

- Suction lift up to 8m
- Fluid temperature up to +60° C
- Max ambient temperature +40° C
- Max working pressure up to 6 bar

Perfromance Range

- Flow up to 45L/min(2.7m³/h)
- Head up to 60m

Component	Material
Pump body	Cast iron
Motor bracket	Aluminium
Impeller	Brass
Motor shaft	SS304 or CS#45
Mechanical seal	Ceramic and graphite
Bearing	Normal or C&U

※Brass or stainless steel inserts are available if request,which reducing the difficulties when starting the pump after long period without use due to the impeller block

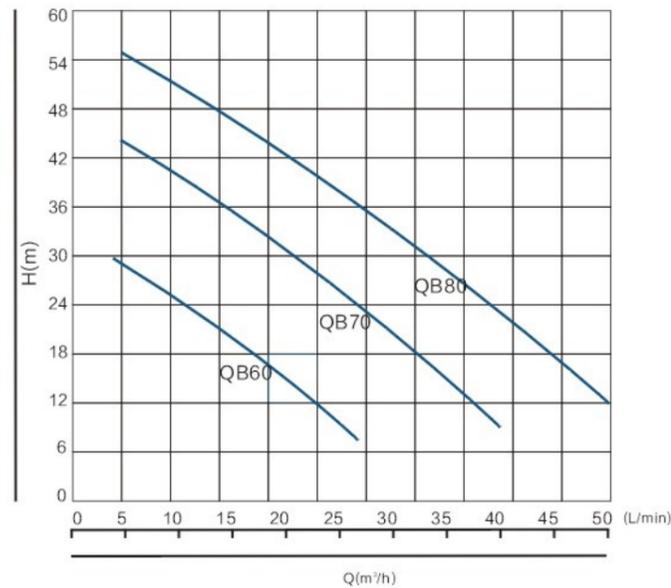

Motor Information

- Single phase two-pole induction motor
- 220V/50Hz 220V/60Hz 110V/60Hz
- Thermal protector,continuous duty.
- Insulation calss: B
- Protection:IP44

Technical Parameters:

Model	Power		Inlet inch	Outlet inch	Max Flow m³/h	Max Head m	Max Suction m	Dim mm	G.W kg

Hydraulic Performance Curve:

Application:

- Clear water, non-aggressive liquid only without sand or other solid impurities.
- Domestic use/irrigation.
- Bigger suction with self priming.
- Low power.
- In particular for delivering water in combination with small pressure sets and for irrigation.

Material:

- Pump body: Cast iron (HT200).
- Motor support: Aluminum.
- Impeller: Brass.
- Motor shaft: CS 45# or stainless steel.
- Mechanical seal: Ceramic / Silicon carbide.
- 100% Copper Winding.

Hydraulic Performance Curve:

Motor:

- 2 pole induction motor.
- Single-phase, 50Hz / 60Hz.
- Insulation: Class B/Class F.
- Protection: IP 44.
- With capacitor and thermal overload protection.

Operating Conditions:

- Suction lift up to 8 m.
- Liquid temperature up to +60°C.
- Ambient temperature up to +40°C.
- Max. Working pressure: 6 bar.

Technical Parameters:

Application&feature:

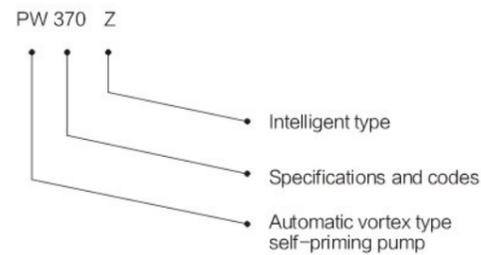

PW series automatic vortex type self-priming pump mainly consists of four parts: motor, water pump, seal and control system. The motor is asynchronous motor, the impeller structure of the electric pump is vortex type, which has the characteristics of small flow, high head, good self-priming, etc. The electric pump is equipped with control system, according to the change of water pressure or water flow, to realize the automatic operation of the electric pump, that is, open the valve electric pump automatic operation, close the valve electric pump automatic stop, No need to manually turn off the power. This series has the function of stable pressure water supply, the electric pump is small in size, light in weight, compact in structure, simple and convenient in installation, It is an ideal household electric pump with high efficiency, energy saving and safety.

Product use:

Used for conveying clean water and other liquids with similar properties to water without grinding particles. It is suitable for water pipeline pressurization, water tower pressurization, pumping well water, garden watering, solar energy pressurization, hot water pipeline pressurization, vegetable greenhouse watering and aquaculture water supply and drainage and other occasions.

Application&feature:

The pumps are suitable for pumping clean water and fluids which are not chemically aggressive to the pump components. The pumps are used in domestic and civil applicants and in particular the automatic distribution of water from small and medium sized surge tanks, for transferring water, for watering gardens etc. They are reliable, simple, quiet and virtually maintenance-free.

Working Condition:

Suction lift up to 8m
 Fluid temperature up to +60° C
 Max ambient temperature +40° C
 Max working pressure up to 6 bar

Hydraulic Performance Curve:

Application&feature

The pumps are designed for domestic ,agricultural and industrial use.
The shapes of their volutes and impellers, with ample passages,make them suitable for pumping even fairly dirty water.
They can achieve high delivery rates under continuous or heavy duty,making them advantageous for rain and gravity irrigation, for pumping water from lakes,rivers , wells and for a wide variety of industrial uses where high delivery rates must be achieved at low to average heads.

Working Condition

Suction lift up to 8m
Fluid temperature up to +60° C
Max ambient temperature +40° C
Medium flow rates

Application&feature:

Pumping clean water without abrasive particles and liquids that are not chemically to the components.
Mainly used for domestic water supply ,farm irrigation, pumping garden and drainage in breeding industry .
Pumping water from wells, rivers,tanks,

Working Condition:

Max.submerged depth:5m
Fluid temperature up to +60°C
Max ambient temperature +40°C

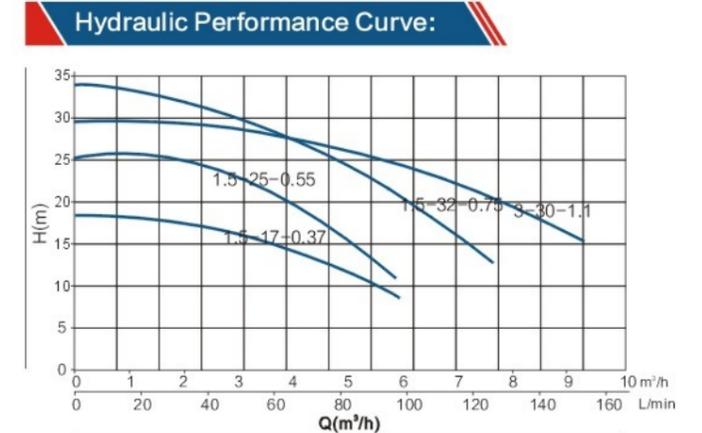

Component	Material
Pump body:	Cast iron
Motor bracket:	SS304
Impeller:	Aluminium or PPO
Motor shaft:	CS#45 or SS304
Mechanical seal:	Ceramic-graphite
Bearing	Normal or C&U

Motor Information:

- Two-pole induction motor
- Single-phase 220V/50Hz 110V,220V/60Hz
- Three-phase 380V/50Hz,60Hz
- Thermal protector for single-phase ,
- Continuous duty.
- Insulation calss: E
- Protection:IP X8

Technical Parameters:

Application:

- Characterized with high heads, compact size, light weight and convenient use.
- Vastly used in high position water delivery, flush and places as construction sites.

Material:

- Pump body: Cast iron.
- Motor Bracket: SS.
- Impeller: Cast iron.
- Motor shaft: CS 45#.
- Mechanical seal: Silicon carbide + hot pressing Graphite.

Hydraulic Performance Curve:

Operating Conditions:

- Submersible depth up to 5m.
- Liquid temperature up to +40°C.
- PH value in the water is between 6.5-8.5.
- Passage of suspended solid up to 2mm.

Motor and Pump:

- 2 Pole induction motor.
- Single phase, 220v, 50/60Hz.
- With thermal overload protection.

Technical Parameters:

Application Limits:

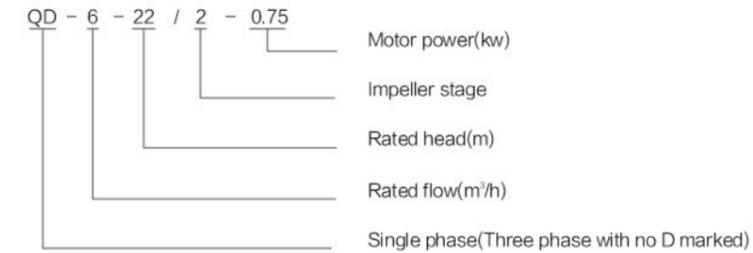

- Liquid temperature up to +40°C
- PH:6.5- 8.5
- Solid impurity size of not more than 0.1 %, the particle diameter of not more than 0.2mm
- 50HZ, single phase voltage 220V, three phase voltage 380V , Voltage fluctuation range of ratings ± 10%
- The head not less than the 80% rated head. Immersion depth from 0.5m to 5m

Features:

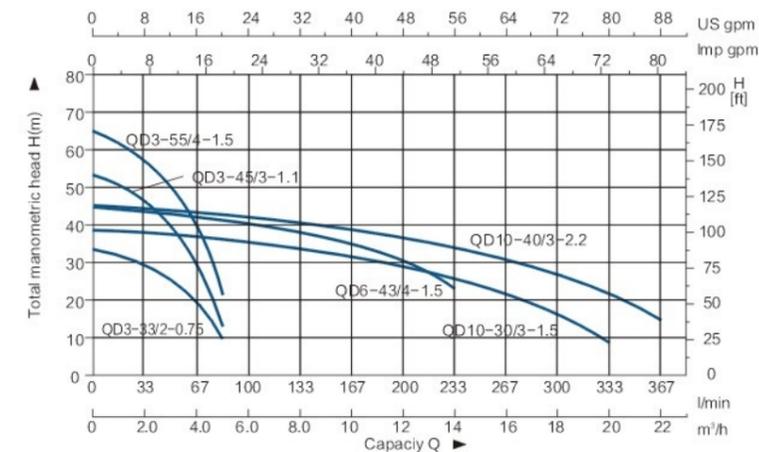

High head ,multistage centrifugal pump
Compact structure, covering small area .convenient to move and use
The good bearing, improving the service life

Model Implication:

Application:

Suitable for use with clean water that does not contain abrasive particles.
As a result of their reliability and the fact that they are easy to use, and suitable for use in applications such as domestic, gardening, irrigation and emptying tanks.

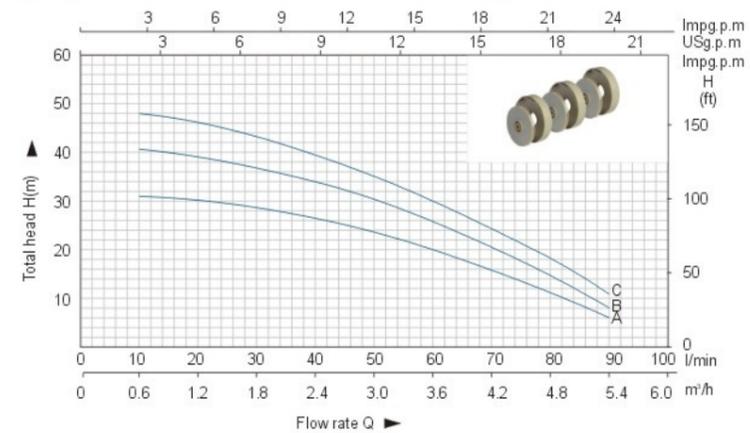

Operating Conditions:

- 8m maximum immersion depth
- Liquid temperature up to 35°C
- Maximum ambient temperature 40°C

Application:

- Domestic / Commercial / Industrial use.
- Drainage of sewage from the building basements, hotel, Industry waste water from factories.
- Pumping surface and draining water from the garages and sprinkler systems.
- Being equipped with a double-channel impeller.
- The big flow, medium-low head.

Operating Conditions:

- Submersible depth 5 m.
- Liquid temperature up to +40°C.
- Ambient temperature up to +40°C.
- Max. Working pressure: 6 bar.
- Passage of suspended solid up to 35 mm.

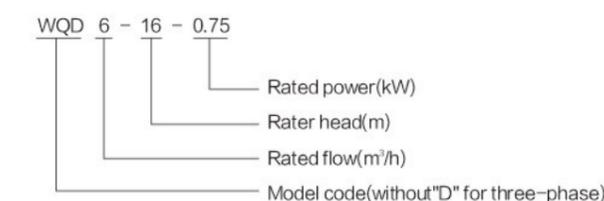

Motor:

- 2 pole induction motor.
- Single-phase / Three-phase, 50Hz / 60Hz.
- Insulation: Class E.
- Protection: IP X8.
- Single-phase with capacitor.
- With thermal overload protection.

Material:

- Pump body: Cast Iron.
- Motor bracket: Cast Iron.
- Impeller: Cast Iron.
- Motor shaft: SS420 or Cs45#.
- Mechanical seal: Ceramic-Graphite, Silicon Carbide-Carbide alloy.

Application&feature :

The pumps are designed for draining dirty water, waste water and sewage in domestic and civil applications. Being equipped with a half-open impeller, the pumps are allowed to pump liquids containing suspended solids up to $\Phi 45\text{mm}$ and short fibres. The pumps are outstanding in the reliability with automatic float switch and builded in over-load protector.

Working Condition :

Max.submerged depth:5m
 Fluid temperature up to +60°C
 Max ambient temperature +40°C
 Max passage for suspended solids: $\Phi 45\text{mm}$

Component	Material
Pump body	Cast iron
Motor bracket	Stainless steel
Impeller	Cast iron
Motor shaft	CS#45 or SS304
Mechanical seal	Ceramic-graphite
Bearing	Normal or C&U

Motor Information:

- Two-pole induction motor
- Single-phase 220V/50Hz 110V,220V/60Hz
- Thermal protector for single-phase ,
- Continuous duty.
- Insulation class: E
- Protection:IP X8

Technical Parameters:

Application:

- Wastewater drainage in factories, construction sites and commercial facilities
- Drainage system in municipal sewage treatment plants
- Drainage station in residential quarters
- Municipal projects
- Methane pools and field irrigation in countryside

Pump:

- Max: immersion depth: 5m
- Max: liquid temperature: +40°C
- Liquid PH value: 5-9
- Liquid kinematic ciscosity: $7 \times 10^{-6} \sim 23 \times 10^{-6} \text{m}^2/\text{s}$
- Max. liquid density: $1.2 \times 10^3 \text{kg/m}^3$

Motor:

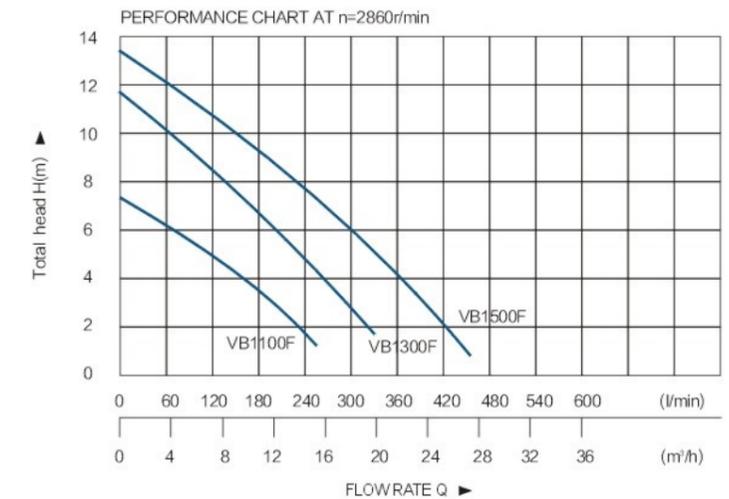

- Copper winding
- Built-in thermal protector
- Stainless steel welded shaft
- Insulation class :B
- Protection class:IPX8

Technical Parameters:

Model	Power (kw)	Outlet Diameter (Inch)	Voltage/ Frequency (V/HZ)	Max. Flow (/min)	Max. Head (m)	G.W. (Kg)	Dimensions (cm)

VB1800F	1.8	3"	220/50	438	13	28	59X35.5X25.5

Hydraulic Performance Curve:

Application&feature:

The sewage grinder pumps are designed with a grinder system which grinds solids into small pieces so that they can be led away through pipes. The pumps are designed for draining dirty water, waste water and sewage from restaurants, hotels, camping sites, factory etc.

The pumps can be installed on an auto-coupling system or stand freely on the bottom of the pit.

The pumps is equipped with an open impeller

Working Condition:

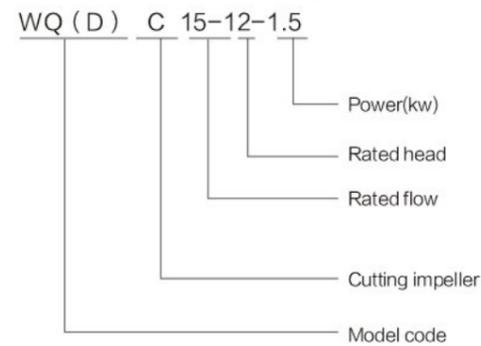

Max.submerged depth:5m

Fluid temperature up to +60°C

Max ambient temperature +40°C

Model Implication:

Component	Material
Pump body	Cast iron
Motor bracket	Cast iron
Impeller	Cast iron
Motor shaft	CS#45 or SS304
Mechanical seal	Ceramic-graphite
Bearing	Normal or C&U

Motor Information:

- Two-pole induction motor
- Single-phase 220V/50Hz 110V,220V/60Hz
- Three-phase 380V/50Hz,60Hz
- Thermal protector for single-phase ,
- Continuous duty.
- Insulation calss: E
- Protection:IP X8

Technical Parameters:

Model	Volt.	Power		Outlet	Max. Flow	Max Head
		KW	HP			
single phase	V			inch	m³/h	m
WQDC15-12-1.5	220	1.5	2	2"	29	16.8

WQC25-12-2.2	380	2.2	3	2"	35	18

Application&feature:

- Domestic/Commercial/Industrial use
- Drainage of sewage from the building basements, hotel. Industry waste water from factories.
- Pumping surface and draining water from the garages and sprinkler systems.
- Being equipped with a double-channel impeller

Operating Conditions:

- Submersible depth 5m
- Liquid temperature up to +40°C
- Ambient temperature up to +40°C
- Max. working pressure: 6bar
- Passage of suspended solid up to 35mm

Motor:

- 2 pole induction motor.
- 1-phase /3-phase ,50hz/60hz
- Insulation: Class E
- Protection: IP X8
- Single-phase with capacitor and thermal overload protection.

Material:

- Pump body: Cast Iron
- Motor bracket: Cast Iron
- Impeller: Cast Iron
- Motor shaft: SS420/CS45#/SS316
- Mechanical seal: Ceramic-Graphite, Silicon Carbide-Carbide alloy.

Technical Parameters:

Application&feature:

The pumps are designed for dirty pumps. They are used for draining flood in basement and garage, farm irrigation ,pumping waste water in facotries,,breeding aquatics , mining and construction sites. The installed float switch automatically control it on and off with the liquid level down and up.

Working Condition:

Max.submerged depth:5m
Fluid temperature up to +60°C
Max ambient temperature +40°C
liquid PH limits:6.5-8.5

Component	Material
Pump body	Cast iron

Application:

The pumps are for pumping clean water without abrasive particles and liquids that are chemically non-aggressive to the materials of which the pump is made of. They are mainly used for welling pumping, river pumping, farm irrigation, water supply and etc

Working Condition:

Max.submerged depth:15m
 Fluid temperature up to +40°C
 Max ambient temperature +40°C
 Mini well Diameter:4"

Component	Material
Delivery case	AISI 304 SS
Pump body	AISI 304 SS
Motor bracket	AISI 304 SS
Impeller	Screw rubber
Shaft	AISI 304SS
Bearing	Normal, C&U,NSK

Motor&Pump:

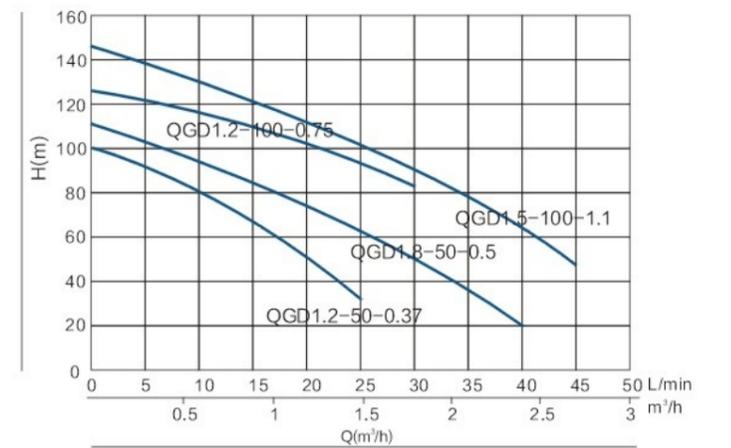

- Rewindable motor
- Single-phase 220V-240V/50Hz,60Hz
- Three-phase:380V-415V/50Hz,60Hz
- Thermal protector for single-phase
- Continous duty
- Insulation: E
- Protection: IP X8

Hydraulic Performance Curve:

Application:

- For water supply from wells or reservoirs
- For domestic use, for civil and industrial applications
- For garden use and irrigation

Motor and pump:

- Rewindable motor
- Single-phase: 220-240V/50Hz
- Three-phase: 380-415V/50Hz
- Equip with start control box or digital auto-control box
- Pumps are designed by casing stressed
- Curve tolerance according to ISO 9906

Options on request:

- Special mechanical seal
- Other voltages or frequency 60Hz
- Single phase motor with built-in capacitor

Warranty: 2 years

(according to our general sales conditions)

PERFORMANCE DATA 50Hz

Typical applications:

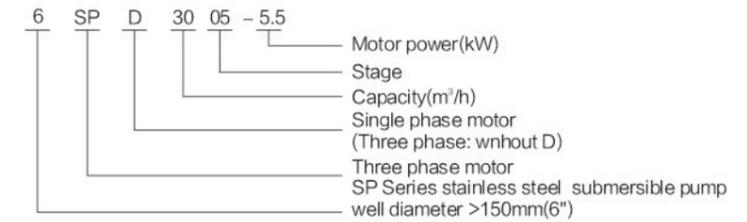

- Water supply system
- Booster
- Garden and farm irrigation
- Lowering underground water level
- Various industrial applications

Pump /Motor

NEMA: standard
 Q max: 47 (m³/h)
 Insulation class; F
 Protection grade: IP 68
 Maximum diameter: φ 143mm
 Highest temperature of liquid: 35°C

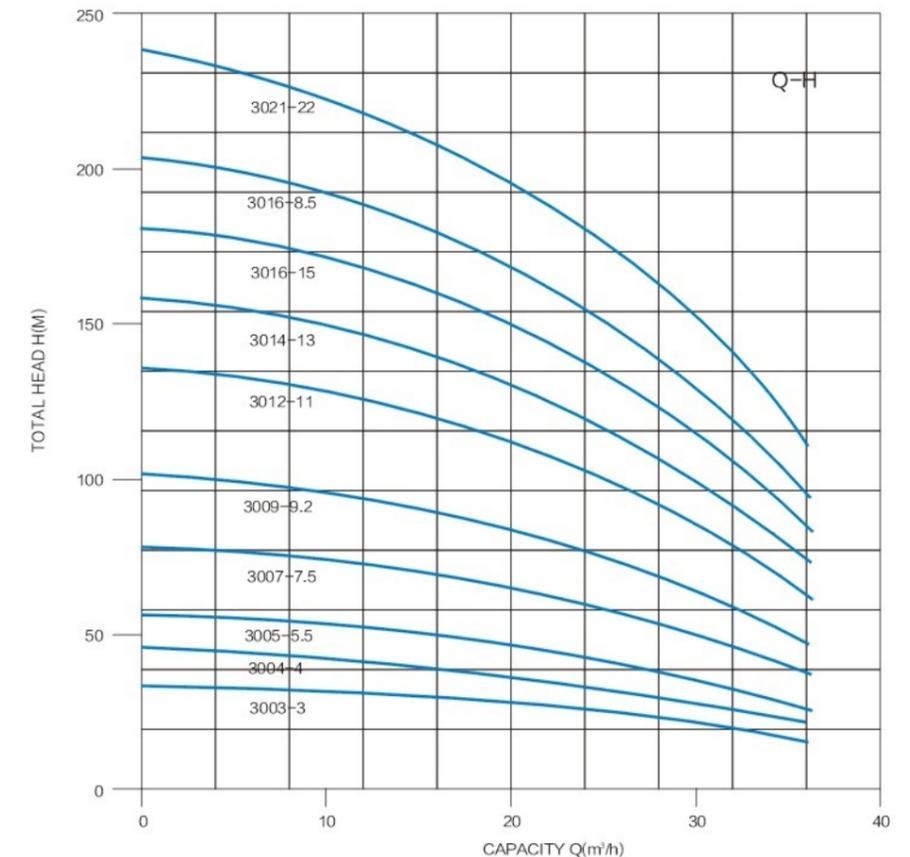

Model Implication:

Application:

- For pumping clean water with sand content less than 150g/m³.
- For well pumping, river pumping, farm irrigation, water supply, mining, drainage in breeding industry.

Operating Conditions:

- Submersible depth: 15m.
- Liquid temperature up to +40°C.
- Ambient temperature up to +40°C.
- Max. sand content: 150g/m³.
- Min. well diameter: 4".

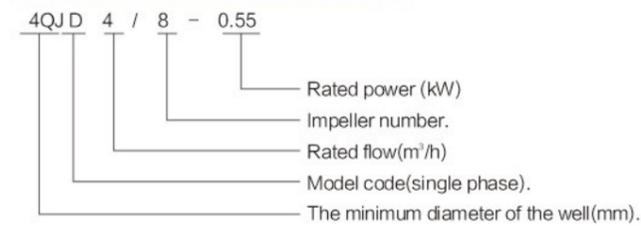

Material:

- Pump body: Stainless steel.
- Motor bracket: Stainless steel.
- Motor shaft: Cs45#.
- Pump shaft: CS40Cr.
- Mechanical seal: Graphite-Ceramic.
- Impeller: POM.
- Coupling and outlet: Cast iron with electrophoretic paint.

Motor:

- 2 pole induction motor.
- Single-phase/Three-phase: 220V 50Hz.
- Dry function motor.
- Insulation: Class B.
- Protection: IP X8.
- Outlet diameter: 1.5".

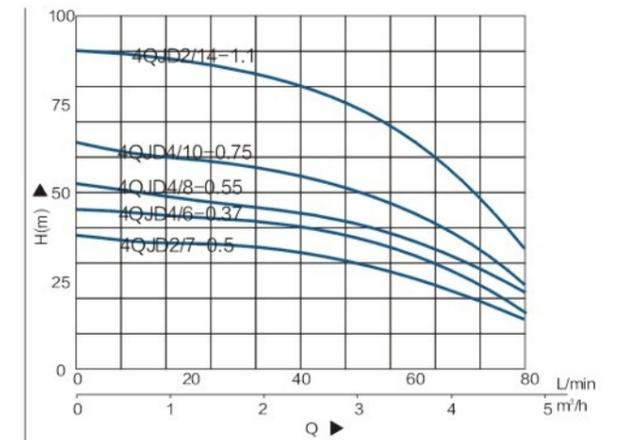

Model Implication:

Technical Parameters:

Model	Power		Outlet (Inch)	Flow					Dim.(mm)

Hydraulic Performance Curve:

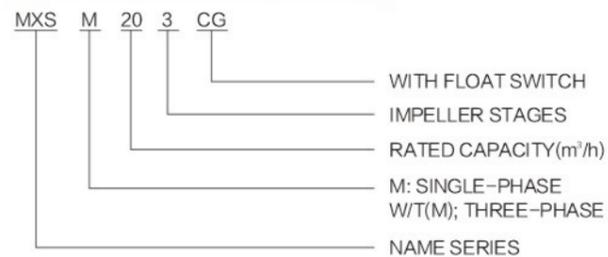

Application:

- For water supply from wells, tanks or reservoirs.
- For domestic use, for civil and industrial applications.
- For garden use and irrigation, Utilization of rain water,

Specification:

- Insulation class: F
- Protection class: Ip68
- Water temperature up to 35°C
- Minimum internal diameter of well: 132mm
- Minimum immersion depth: 100mm
- Maximum immersion depth: 20m (with suitable cable length)
- Continuous duty
- Power: single-phase: 0.55 kW~ 1.5kW
three-phase: 0.55 kW~ 1.5kW
- Power supply:
MXSM: single phase 230v+10%, 50Hz; 220V+10%, 60Hz;
Control box with capacitor. And thermal device; Float switch (on demand)
- MXS: three phase 230v+10%, 50Hz; 220V± 10%, 60Hz;
three phase 400v+10%, 50Hz; 380V+10%, 60Hz;
- Cable length: 15m

Model Implication:

Special features on request:

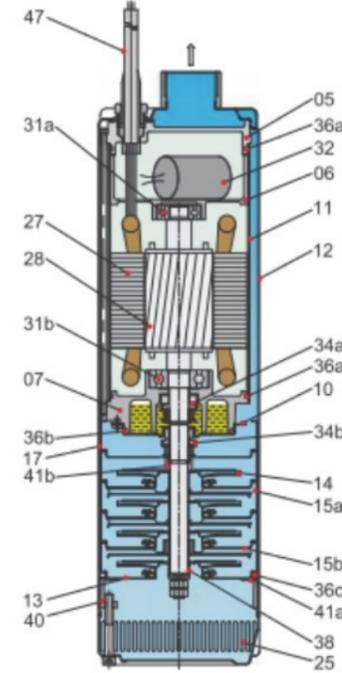

- Other voltages
- The length of cable is optional

Material of construction:

Application:

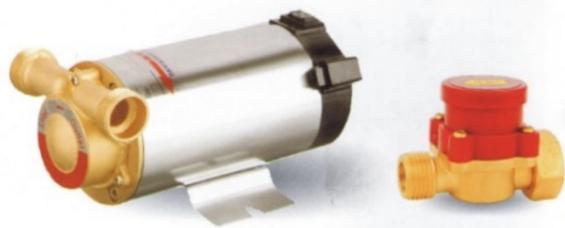

- Maximum fluid temperature up to 60°C.
- press water supply for shower.
- Tap water booster.
- Obtain water from pool.
- Water circulating for equipment.

Motor:

- Single-phase, 50Hz / 60Hz.
- Insulation: Class F.
- Protection: IP 44.
- Wide voltage range design, single-phase and three-phase.

Material:

- Pump body: Cast iron.
- Pump body :brass.
- Pump shaft :stainless iron.
- Impeller :brass.
- Motor housing :stainless steel.
- Mechanical seal :blacklead.

Operating Conditions:

- Easily fitted and removed.
- Excellent self suction capability.
- Pump controlled automatically by built-in pressure switch.
- Permissible liquid temperature up to 60°C.
- Low noise, excellent corrosion resistance, high pressure.

Mounting positions:

- The motor and the pump united as one, working on the water, more reliable.
- No special requirements for the well casing and lifting pipe. (It can work in Steel tubular well, lime well, earth well etc. Within the reasonable pressure range, steel tube, rubber tube and plastic hose can be used as lifting pipe.)
- Easy to install, operate and maintain, less space demand, no pump house needed
- Simple structure, less cost ,equip with start control box or digital auto-control box , household water pressure booster pumps are designed by casing stressed .

Technical Parameters:

Feature

- The premium hydraulic model and advanced workmanship greatly improve the pumps performance and extend the service life.
- Adopting alloy and fluor in rubber for the mechanical seal, which ensures the pumps' reliable operation and endures high temperature of transmission medium.
- As the overflowing part of pump is stamped and welded by stainless steel plate, which is suitable for slightly aggressive liquids.
- We provide the intelligent protector to avoid dry running, default phase and over loading of the pump to meet customers' demand.
- The motor is with lengthening shaft, axial water inlet and radial water outlet.

Working Condition

- Temperature range of medium: Normal type 0°C ~ + 68°C, hot water type 0°C ~ +120°C.
- Maximum ambient temperature: +40°C
- Maximum working pressure: 10 Bar
- When the density or viscosity of the transmission medium exceeds that of water, it is necessary to select to a driving motor of high-power.

Product Introduction:

• Light-type stainless steel multistage centrifugal pumps are non-self priming pumps absorbing the advanced technology from home and abroad. Adopting standard motor and alloy mechanical seal, which make the replacement more convenient. The overflowing part is made from stainless steel, applicable for: light-corrosion medium. Relying on the high efficiency, energy saving performance, reliable quality, wide usable range, the products are received the great popularity after they have been launched.

Feature:

- The premium hydraulic model and advanced workmanship greatly improve the pumps performance and extend the service life.
- Adopting alloy and fluor in rubber for the mechanical seal, which ensures the pumps reliable operation and endures high temperature of transmission Medium.
- As the overflowing part of pump is stamped and welded by stainless steel plate, which is suitable for slightly aggressive liquids.
- Compact design, small in size, light weight, low noise, excellent energy saving performance, easy to maintenance.
- Inlet and outlet of the pump stand in the same line with the pump base, which can be used directly in the pipelines.
- Clients can allocate the motor based on their own needs.
- We provide the intelligent protector to avoid dry running, default phase and over loading of the pump to meet customers' demand.

Working Condition:

- Liquid temperature: Normal type 0°C ~ + 68°C, hot water type 0°C ~ + 120°C.
- Ambient temperature: -15°C ~ +40°C
- The maximum inlet pressure: 1.0 Mpa/10 Bar
- When the density or viscosity of the transmission medium exceeds that of water, it is necessary to select to a driving motor of high-power.

Application:

- Water supply: water filtering and water delivery in water plants, water delivery for sub-water plants, pressure boost in main pipelines and in high-rise buildings.
- Industrial pressure boost: flow water system, cleansing system, high-pressure washing system, fire extinguishing system.
- Industrial liquid delivery: cooling and air-conditioning systems, boiler water supply, condensation system, machine tool, transmission of the acid and alkali mediums.
- Water treatment (Water purification): ultra-filtration system, reverse osmosis system, distillation system, water treatment system for separator and Swimming pool.
- Irrigation: irrigating of crops, spray irrigation and drop irrigation.

Motor's Selection:

- Full-enclosed and ventilating two-pole standard motor
- Protection class: Ip55
- Insulation class: F
- Standard voltage /Frequency: Single phase / Three phase; 50Hz/60hz.

Application:

Series is progressing cavity screw pump (single screw pump). It belongs to the group of rotary positive displacement pumps. It is used in almost industry sectors for conveyance and dosing of various media. Preferably, media with or without solids having low to very high viscosities conveys. However, it is also suitable for conveying aggressive media, such as the ones used in papermaking, wastewater treatment or brewery.

- City sanitation: Activated sludge, Sewage, Cement milk, Concentrate scum, Mud, Digested sludge, Primary Sludge
- Ship: Sludge, Bilge, Chemical
- Food: Millet-jelly, Jam, Starch, Butter, Yeast, Ground meat, Ground fish, Fruit, Vegetable, Comed beef, Ketch up enveloping,
- Paper and Cellulose: Pulp, Clay and Starch
- Chemical: Grease, Material of chemical fiber, Coating color, Pitch, Waste oil
- Cosmetics: Cream, Tooth paste, Antibiotics, Glycerin
- Paints: Pigment, Picture ingredient, Lacquer
- Steel manufacturing and ceramic industry: Grinding liquid, Clay, Blaster, Pit liquid waste

Feature:

High suction of lifting up to 5m and self priming is especially powerful. It can handle liquid containing solids (Max.50mm), fiber, flock and so on without destroying it. As positive-displacement pump, capacity is directly proportional to the speed without being influenced by delivery pressure. Pump works without pulsation or turbulence. It can handle high viscosity and density liquid. It is available for maximum viscosity of 200,000 cps and water containing rate of 50% depend on materiality. As bearings are placed externally, fluids are not contaminated. Fluid flow direction can be changed, so reversed running is possible. Simple construction with a few parts. Wide range of materials of components parts enable to handle all kinds of fluid, such as high corrosive media. As sealing is set on suction side, there are a few burdens and maintenance is easy.

Technical Parameters:

Application:

LQ3G Triple screw pump is used for transport of viscous fluids with lubricating properties. They are suited for a variety of applications such as fuel-injection, oil burners, boosting, hydraulics, fuel-lubrication, circulating, feed and so on. It is only applicable to converting lubricating fluids not containing solid particles at normal temperature. It maybe used as a common delivery pump, and a pressure supply pump in hydraulic drive device. The maximum working temperature is equal to or lower than 350°C.

- Bitumen
- Heavy diesel
- Heavy fuel oil
- Heavy gear oil

Feature:

Triple screw pump is a positive displacement pump, it is often used to pump high-pressure viscous fluids. Three screws drive the pumped liquid forth in a closed chamber. As the screws rotate in opposite directions, the pumped liquid moves along the screws' spindles. LQ3G Triple screw pumps have several advantages. The pumped fluid is moving axially without turbulence which eliminates foaming that would otherwise occur in viscous fluids, They are also able to pump fluids of higher viscosity without losing flow rate. Also, changes in the pressure difference have little impact on PD pumps compared to centrifugal pumps. LQ3G series pump are designed with heating jacket, it specially uses for pumping media that generally pre-heating and reduce viscosity.

Application:

- The pump is most suitable for hydromassage bathtub and sea water convey;
- Weak corrosive liquid (weak acid and weak alkali) without solid granules.

Feature:

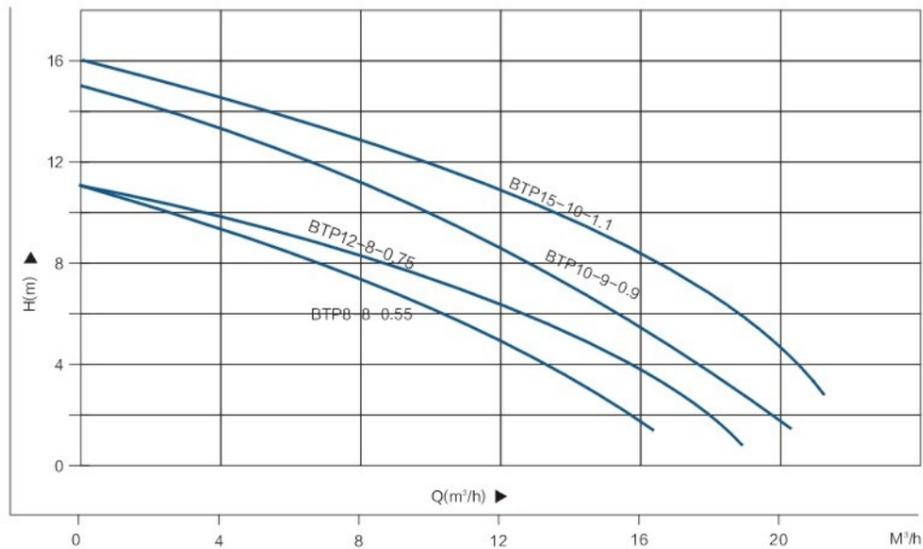

- Electric pump over-current components using high-strength engineering plastics, with high-quality wear-resistant mechanical seal
- 71 frame, the frame with machine feet conjoined, strong and reliable.
- Pump apply for low noise standard motor. Single-phase with thermal protector from TI, USA.
- Motor is with high temperature bearings, long operating life with reliability and durability.
- Complete separation of water and the axis, safe and reliable
- Optional pneumatic switch, to ensure ease of use, security.
- Insulation class F, Protection IPX5.
- The pump obtained the certification of CE, TUV, SAA.

Operating Conditions:

- Medium temperature: 5-50°C.
- Environmental temperature: 0-40°C.
- Max. working pressure: 0.3Mpa

Hydraulic Performance Curve:

Technical Parameters:

Model	Power		Current/Frequency (V/Hz)	Max. Flow (m³/h)	Max. Head (m)	DIM.(mm)	Weight (kg)

Application:

- Pressure boosting of medium or large STP pool and cleaning system of jetted bath tubs, spa pools.
- Water circulation in fishery.
- Decorative pool, water display, water processing.
- Weak corrosive liquid (weak acid and weak alkali without solid granules. Liquid temperature: +5-60°C.

Feature:

- Pump: STP series is most maturely swimming pool pump and is approved by customer. The pump casing applied efficient structure design with max flow, max head and low noise. Cap and filter is easy to install and unload. Liquids part is made of high reinforce engineering plastic. Applied mechanical seal type ensure watertight in long-time continuous operation. The high reinforce engineering plastic base is vibration-resistance and corrosive-resistance. STP series is preferred product for sand filter and swimming pool.
- Motor: Air cooling motor is suitable for Europe. The material of frame is aluminum; it is under low-noise and less-vibration and durability. Insulation class F, protection IPX5, continuous duty; Single-phase with thermal protector from T1 to ensure safety and convenience.
- Certificate: 1、SAA A/11421EA
2、CE certificate in EU.
3、TUV certificate in Germany.
4、RoHS approval

Application:

Clean water without abrasive particles. Mainly used for well pumping, river pumping, flowing collection rain water. Pumping water out from cellars, garages, basement. Water supply, drainage in breeding industry.

Operating Conditions:

- Submersion depth 5m.
- Liquid temperature Range 0~40°C.
- Max. working pressure: 8bar.

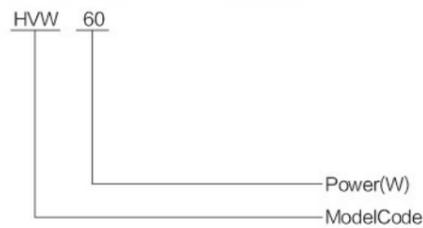

Material:

- Pump body: Aluminum.
- Motor shaft: Aluminum.
- Impeller: Rubber.
- Motor shaft: Stainless Steel/CS450/CS40Cr.
- 100% copper winding.

Motor:

- 2 pole induction motor.
- Single phase 220V, 50/60Hz; Three phase 380V, 50/60Hz.
- Insulation: Class B.
- Protection: IP68.
- With thermal overload protector

Application:

- Clean water with little impurities, non-corrosive liquid.
- Domestic, agricultural and industrial use.
- The big flow rates, medium-low head.

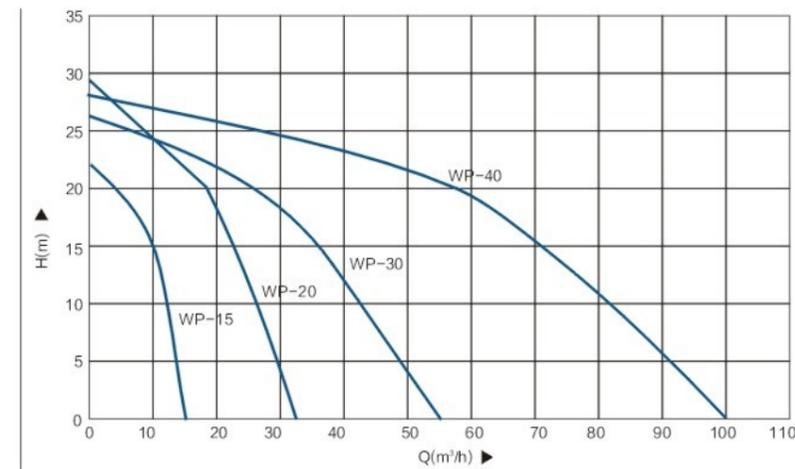

Operating Conditions:

- Suction lift up to 7 m.
- Liquid temperature up to +40°C.
- Ambient temperature up to +40°C.
- Max. Working pressure: 3 bar.

Material:

- Pump body: Aluminum.
- Engine support: Aluminum / Cast iron.
- Impeller: Cast iron.
- Mechanical seal: Ceramic-Graphite or Ceramic-Carbide alloy.

Hydraulic Performance Curve:

Engine:

- Gasoline Engine Type: 152F / 168F / 188F.
- (n=3600 r.p.m).
- Single cylinder.
- 4-stroke.
- Air-cooled.
- Ignition system: transistorized magneto ignition.
- Starting system: Recoil or Electric starter.

Material of pump:

- Outlet Iron
- Pump: head: Iron or stainless steel
- Pump body: stainless steel
- Impeller: Impeller
- Motor: DC brush motor
- Cable: 2-20M

Product Feature:

- Only use it for clean water
- Small flow, fit for home use, drinking water

Model Analysis:

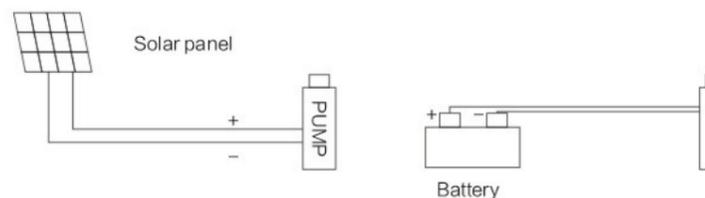

- DSP:DC Brush solar pump impeller model
- DSPT: DC Brush solar pump impeller iron model
- 12: pump voltage
- 20: max head 2
- 2.5: max flow
- 200; pump power
- 1: outlet

Material of pump:

- Outlet: stainless steel
- Pump head: Iron or stainless steel
- Pump body: stainless steel
- Impeller: screw
- Motor: DC brush molor
- Cable: 20M

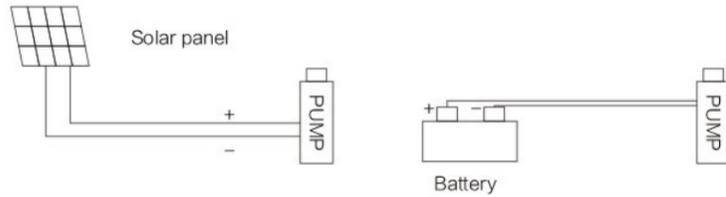

Product Feature:

- Only use it for clean water
- Small flow, fit for home use, drinking water

Model Analysis:

- DQG:DC Brush solar pump screw model
- DOGT: DC Brush solar pump screw iron model
- 24: pump voltage
- 45: max head
- 2: max flow
- 250: pump power
- 1: outlet

Installation Diagram:

Technical Parameters:

Model	Voltage	Power	Max Flow	Max Head	outlet	Cable
	V	W	m ³ /h	m	In	m
4DQG(T)2/45-24/250	24	250	2	40	1"	20
4DQG(T)2/55-36/360	36	360	2	55	1"	20
4DQG(T)2/65-48/500	48	500	2	65	1"	20

Application:

- These electric pumps series are workable within maximum head, as there are no restrictions of BDC. With the addition of high head, high efficiency and wide high efficiency zone, they are suitable for distance water irrigation, high efficiency of increasing oxygen on aquaculture, pumping water from deep well, gardening, Fountain and etc.

Product Feature:

- Compact structure, highlift, noiseless, pollution-free; complete electrical protecting controller device; against under-voltage, over-voltage, over-flow, overload; waterless etc; automatic recovery; controlling water height 8s demand.
- Easy installation, maintenance-free, safe and reliable.

Working condition:

- Non-corrosive water; the volumie ratio of sand content no more than 3% particle size less than 0.5mm.
- Max medium temperature up to +40°C ; PH value remains 5-10.
- Work close to the rated head and must be immersed in water.

Technical Parameters:

Material of pump:

- Outet: Plastic
- Pump body: Iron
- Impeller: Plastic
- Motor: DC brush motor
- Cable: 3-5M

Product Feature:

- Only use it for clean water.
- Low flow, Small flow, fit for home use.
- drinking water.
